

DATA SHEET

TAGL

TAPE, FIBREGLASS, NON ADHESIVE

E-fibreglass tape abbreviated as E-glass tape is woven of E-fibreglass. With its features of heat-resistance and insulation, it can be used as the binding of boils for electrical machinery and appliances.

Length: Each reel contains 50 meters of the tape.
Tapes, longer than 6 meters, have connections only once in a reel.

TAPES

Thickness (mm)	Width (mm)	Tolerance (mm)	Density (strand/cm)		Tensile Strength (N/strip 10*100mm)	Texture
			warp	weft		
0.100±0.010	13: 15	±1	27±2	15±1	200	Plain weave
	20: 25	±2				
0.170±0.015	20: 25	±2	27±2	15±1	270	Plain weave
